

Lexington Manufacturing

ROBOTIC PAINTING

Accuracy & consistency that meets or exceeds the most demanding specifications.

Hassel Free

We source the material, fabricate and paint the component then ship it—ready to be installed.

Flexibility

Customizable colors and the ability to handle complex profiles.

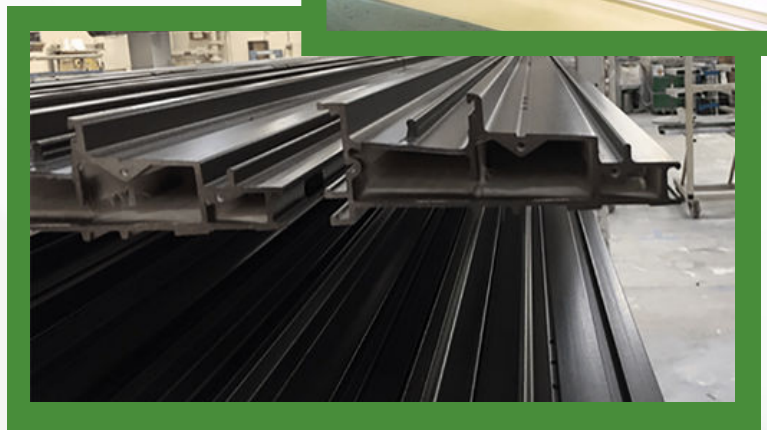

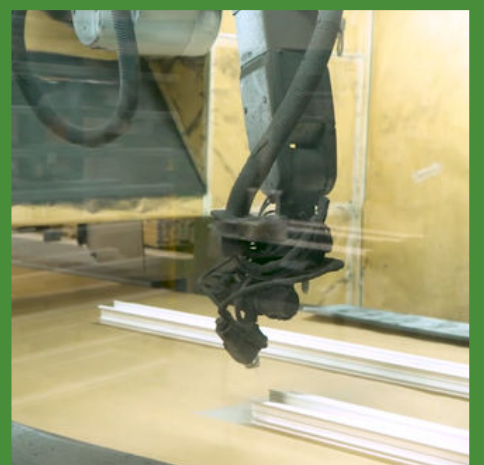

CAD programmable

Using CAD, we can program various angles for precise amounts of time to apply an exact amount of paint. This reduces wasted paint and overspray on intricate components while providing consistent coverage.

Variety of Sizing

Our robotic paint system produces finished components in sizes from 1 foot to 16 feet.

WHY LEXINGTON?

At Lexington, we're your go-to problem solvers for component manufacturing, regardless of the substrate or composite material. Our approach allows you to concentrate on your core competencies while elevating your efficiency and profitability.
