

# PROFILE WRAPPING

Lexington Manufacturing delivers industry-leading profile-wrapping solutions designed for the window, door, moulding, and architectural markets. With proven expertise in complex geometries, dark colors, and challenging substrates, we wrap a wide range of core materials with precision and consistency to create high-value, design-forward components.

Our advanced wrapping lines ensure reliable adhesion, uniform appearance, and long-term durability—helping customers enhance product performance, achieve exact-match aesthetics, and expand their design offerings with confidence.

## LAMINATION EXPERTISE

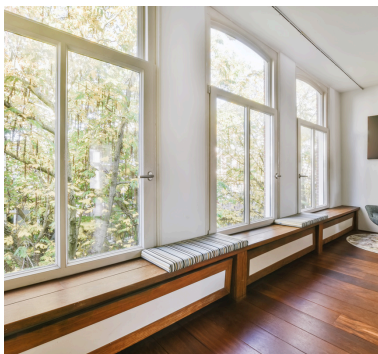

- Plasma treatment
- Corona treatment
- Chemical treatment
- Abrasion treatment
- 3D printing – design of custom wrap fixtures for challenging components

## CORE MATERIAL

- Finger jointed wood
- Aluminum extrusions
- MDF/ particleboard
- PVC extrusion
- Fiberglass pultrusion
- High-density Urethane

## OVERLAY MATERIALS

- Natural Veneer
- Woodgrain vinyl
- Interior vinyl
- Exterior vinyl
- Stainable woodgrain vinyl
- Impregnated papers/foils

## WHY LEXINGTON?

At Lexington, we don't just manufacture components—we engineer solutions. With more than 40 years of experience serving the fenestration and architectural industries, our team combines deep material knowledge, advanced lamination technologies, and rigorous quality systems to solve complex manufacturing challenges. Whether your components require exact-match aesthetics, enhanced durability, or efficient production flow, our custom profile-wrapping capabilities deliver consistent, high-quality results across a wide range of substrates and overlay materials.
